SHOWA **TAC UPGRADE KIT** TRIPLE AIR CHAMBER

INTERNAL BALANCE CHAMBER

The 2015 CRF250R Showa TAC production fork uses an Internal Balance Chamber instead of the more common External Chamber. The Pro Circuit team suspension that we race with and sell, use both the internal and External Chamber, greatly increasing the Balance Chamber volume. Utilizing the increased volume makes for a smoother stroke with a more consistent ride height. This feature is included in the kit for the 2015/2017 RM-Z450 and 2015/2018 KX450F.

NEW SEAL DESIGN

The new seal design in our upgrade kit mimics what is found in our team suspension. A couple key features the new seal design offers are better sealing and less stiction, resulting in less seals needed. This feature is included in the kit for the 2015 CRF250R, 2015/2017 RM-Z450 and the 2015/2018 KX450F.

UPGRADE KIT AVAILABLE FOR:

- 2015 CRF250R
- 2015/2018 KX450F
- 2015/2017 RM-Z450

AIR-TO-SPRING CONVERSION KIT WP AER 48 AIR FORK & SHOWA TAC AIR FORK

THE KIT

For riders that prefer a more traditional spring system over air forks, Pro Circuit is now offering a simple spring hybrid conversion cartridge kit that can be easily dropped into your WP AER 48 Air Fork or Showa TAC Air Fork*. The fork cap on this conversion kit comes with an air valve that can be used to add just a touch of air to make the fork a little more progressive through the stroke for the faster, more aggressive riders, or even to compensate for special conditions, such as a mud race. It can also be run at zero pressure for the riders that don't want to mess with adding air in their forks. The kit also offers easy spring preload adjustment without taking the fork all the way apart, letting the fork ride a little higher or lower when needed. This hybrid fork spring system is 100% made in the USA and is available for the following applications:

KIT AVAILABLE FOR:

- 2015-2017 Honda CRF250R
- 2015-2018 Kawasaki KX450F
- 2015-2017 Suzuki RM-Z450
- 2016 1/2-2019 KTM SX 125, 250/350/450 SX-F
