## SHOCK COLLAR UPGRADE HUSQVARNA/KAWASAKI/KTM/SUZUKI/GAS GAS

### NEW PRELOAD SHOCK COLLARS

The problem with the OEM preload collars for the 2019-2021 KX450, 2017-2021 RM-Z450, 2016-2021 KTM/Husqvarna and the 2021 Gas Gas models is its plastic composition. During use, the heat omitted from the shock body heats up the plastic as well. A combination of this, along with dirt working its way underneath, the plastic collar becomes deformed, which makes tuning and adjustment extremely difficult. Pro Circuit's solution is very simple. We now offer a CNC-machined 6061 aluminum preload collar with a zinc-plated steel lock ring for improved durability and much easier adjustments. Discard your problematic, plastic OEM preload collar and replace it with Pro Circuit's new preload collars to make future shock preload adjustments a breeze.

## **AIR-TO-SPRING CONVERSION KIT** WP AER 48 AIR FORK & SHOWA TAG AIR FORK

### **THE KIT**

For riders that prefer a more traditional spring system over air forks, Pro Circuit is now offering a simple spring hybrid conversion cartridge kit that can be easily dropped into your WP AER 48 Air Fork or Showa TAC Air Fork\*. The fork cap on this conversion kit comes with an air valve that can be used to add just a touch of air to make the fork a little more progressive through the stroke for the faster, more aggressive riders, or even to compensate for special conditions, such as a mud race. It can also be run at zero pressure for the riders that don't want to mess with adding air in their forks. The kit also offers easy spring preload adjustment without taking the fork all the way apart, letting the fork ride a little higher or lower when needed. This hybrid fork spring system is 100% made in the USA and is available for the following applications:

### **KIT AVAILABLE FOR:**

- 2015-2017 Honda CRF250R
