PRO CIRCUIT LINKAGE SYSTEM **KTM & HUSQVARNA MODELS**

LINKAGE SYSTEM

True to the Pro Circuit name, the new Pro Circuit linkage system for your new model KTM or Husqvarna brings the bike's handling performance to an entirely new level. The 2016 1/2 Factory Edition and 2016-2019 models come equipped with a redesigned OEM linkage system that causes the bike to have a feeling that is much too harsh and stagnant, whereas the preceding bike models had an OEM linkage system providing an unwanted lazy and soft feeling. Both of these OEM designs made it difficult to reach optimal handling performance and forced the use of shock springs on both extremes of the spectrum in order to compensate. The new Pro Circuit linkage system utilizes some of the mechanical advantages of both designs, along with additional Pro Circuit research and testing, to allow for the use of a more true-to-weight spring rate and to reach the ultimate sweet spot in handling for your new model KTM or Husqvarna.

LINKAGE AVAILABLE FOR:

- 2016-2019 Husqvarna TC 125
- 2016-2019 KTM 125 SX

SHOCK COLLAR UPGRADE HUSQVARNA/KAWASAKI/KTM/SUZUKI

NEW PRELOAD SHOCK COLLARS

The problem with the OEM preload collars for the 2019 KX450, 2017-2019 RM-Z450 and the 2016-2019 KTM and Husqvarna models is its plastic composition. During use, the heat omitted from the shock body heats up the plastic as well. A combination of this, along with dirt working its way underneath, the plastic collar becomes deformed, which makes tuning and adjustment extremely difficult. Pro Circuit's solution is very simple. We now offer a CNC-machined 6061 aluminum preload collar with a zinc-plated steel lock ring for improved durability and much easier adjustments. Discard your problematic, plastic OEM preload collar and replace it with Pro Circuit's new preload collars to make future shock preload adjustments a breeze.
